Welcome to the 2019 February Graduate Nurse Program

The aim of Cabrini's graduate programs is to provide a flexible range of supports to assist graduates in transitioning from a student to a professional practitioner.

This online space is designed to provide you with resources that will help you throughout the year, information relating to the study days and an area to submit all required assignments. We also have an online forum where you can discuss the topic of the month with fellow graduates. The more you engage in this space the better we can make it so feel free to provide us with suggestions and improvements in the evaluation section.

If there is any information or resources you would like access to please email the Graduate Program Coordinator.
Professional Pathways

• Ongoing employment

• Transition to Speciality Practice – TSP
  • Cardiac, Perioperative, ICU, Emergency & Respiratory

• Postgraduate
  • Cardiac, Perioperative, ICU, Emergency, Oncology & Palliative Care
Point of Difference
